

Dear EURESTOP members,

it is our great pleasure to invite you to attend a **webinar organized on the ZOOM platform on Jan 16<sup>th</sup>, 2025 at 14:00-14:45 CET time**, which is designed to introduce the [EU-OPENSREEN consortium](#). This is indeed a profitable opportunity for all EURESTOP members and beyond to further extend their research and to profile chemical compounds.

The webinar will focus on the running [compound submission/profiling initiative](#) of EU-OPENSREEN.

EU-OPENSREEN is a not-for-profit European Research Infrastructure Consortium (ERIC) for chemical biology and early drug discovery that supports all stages of a chemical tool development project, including assay adaptation, high-throughput screening and chemical optimisation of the resulting 'hit' compounds.

EU-OPENSREEN operates an open-access database and a unique, common compound collection. Our main library, the European Chemical Biology Library (ECBL), consists of over 100,000 compounds. EU-OPENSREEN has over 30 affiliated high-throughput screening and chemistry facilities at partner sites in eight European countries. These partner facilities provide researchers with access to cutting-edge technologies to develop their own tool compounds.

EU-OPENSREEN aims to support the global scientific and economic competitiveness of Europe by delivering public health benefits. In the future, we will act as an innovation accelerator for new start-ups.

For connecting to the webinar, please use the following link:

Looking forward to meeting you virtually at the webinar!

Mattia Mori (EURESTOP Chair)

Victoria Mora (EU-OPENSREEN Analytical Chemist)

Robert Harmel (EU-OPENSREEN Scientific Project & Industry Liaison Manager)
